

Digital Portfolio Website Project: Comprehensive Outline & Planning

1. Navigation & Website Structure

The website will be organized into a multi-page format to ensure clear separation of content and ease of navigation.

Page Name	Primary Purpose
Home	An introduction hub with a professional greeting and quick-access links to core projects.
About Me	A narrative introduction covering personal background, academic goals, and varied interests.
Resume	A formal breakdown of education, extracurricular leadership, and technical projects.
Skills	A categorized visual display of technical, academic, and creative proficiencies.

2. Design Expectations (Front-End)

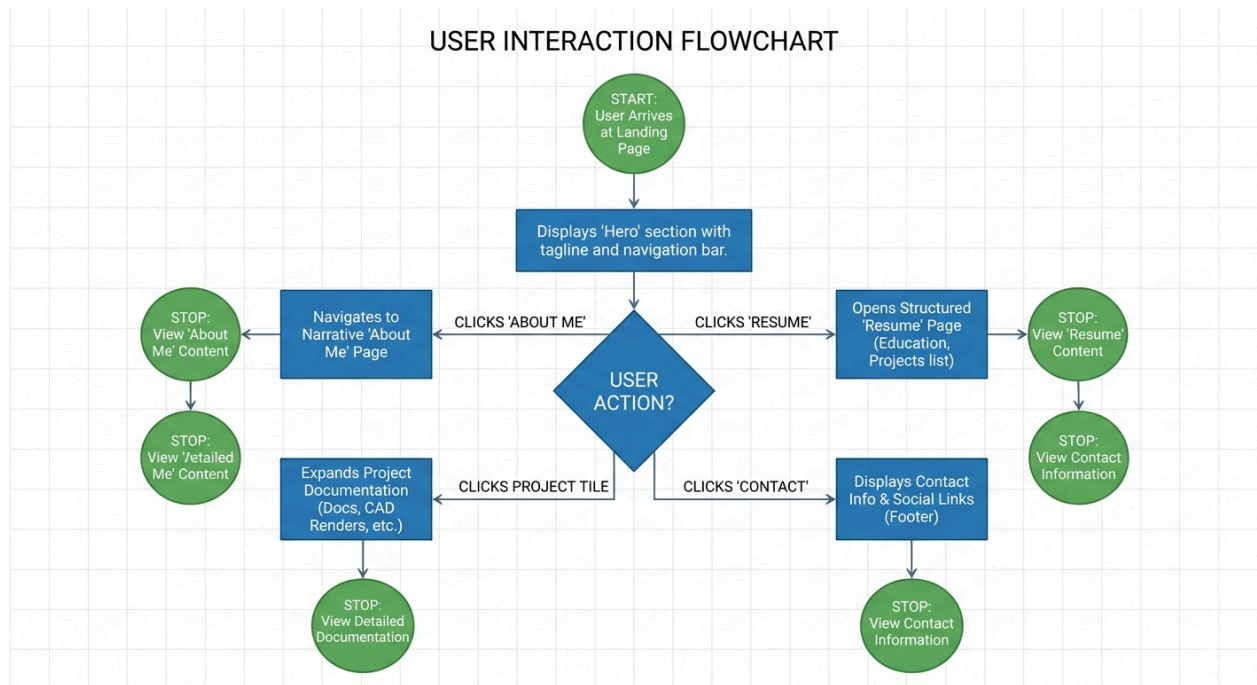

- Layout: Clean, minimalist grid system with ample white space for readability.
- Color Scheme: Professional palette of Deep Navy, Slate Grey, and a vibrant accent
- Typography: Professional sans-serif fonts (e.g., Roboto or Inter) for a modern, accessible feel.
- Visuals: High-quality exports of CAD models, icons for skill categories, and professional performance imagery.

3. Technical Functionality (Back-End)

- Navigation Menu: A persistent (sticky) header with active links to all site sections.

- Responsiveness: Flexible CSS layouts to ensure the site scales correctly for mobile, tablet, and desktop viewing.
- Interactive Elements: Hover effects on project tiles and smooth-scroll transitions between sections.
- Hosting/Deployment: Integration with GitHub Pages for version control and live hosting.

4. User Interaction Flowchart

5. Page Content Drafts

Page 1: About Me

I am a 10th-grade student currently based in the New York area. My academic focus is primarily on Chemistry. Outside of the classroom, I also play multiple instruments, like piano and guitar. I also play lots of sports, which are table tennis, alpine skiing, soccer, and tennis. I was captain of the Browning Table Tennis team, helping us get the first season win in the Browning Table Tennis Team. I was also co-captain of the tennis team. My long-term goals involve pursuing a career in pharmaceutical chemistry.

Page 2: Resume

- Education: Kindergarten to 5th grade in PS-158 (Bayard Taylor School), 7th to 8th grade in East Side Middle School, 9th grade in Brooklyn Technical High School, and now currently in Browning for the rest of High School.
- Engineering Project: Design and proposal for a subway safety retrofit using Fusion 360 in CSE.
- Research & Analysis: Author of "The AI Power Crunch," exploring nuclear energy and AI demands. Extensive analysis of Supreme Court case Twitter v. Taamneh and presented in Dialogue class.
- Leadership & Extracurriculars: Leader and collaborator in the "Little Lights" youth-led non-profit . Active member of the Chem Club.

Page 3: Skills Section

- Proficiency in Fusion 360 CAD software, Professional project management including Gantt chart creation.
- Deep research in Constitutional Law and Supreme Court precedents, Bilingual analysis in Spanish and Polish,
- Musical performance (Piano, Guitar),stage performance ; Collaborative leadership within non-profits.

EDUCATION

The Browning School

High School Diploma Candidate | 2026 – Present

- Currently pursuing a rigorous 10th-grade curriculum with a focus on interdisciplinary studies.
- Part of Chem Club

Brooklyn Technical High School

9th Grade | 2025 – 2026

- Engaged in foundational technical and engineering coursework at one of New York City's premier specialized high schools.

East Side Middle School

7th – 8th Grade

PS-158 (Bayard Taylor School)

Kindergarten – 5th Grade

ENGINEERING PROJECTS

MTA Subway Safety Retrofit Design

Computer Science & Engineering (CSE)

- Engineered a mechanical retrofit solution for existing MTA fleet types using **Fusion 360** to enhance passenger safety.

- Developed a comprehensive Bill of Materials and a strategic construction timeline for implementation.

RESEARCH & ANALYSIS

The AI Power Crunch: Nuclear Energy & Infrastructure

Author / Researcher

- Authored a detailed policy narrative analyzing the 20th and 21st-century roots of nuclear power and its role in meeting the energy demands of artificial intelligence.
- Researched global safety standards and the development of Small Modular Reactors (SMRs).

Judicial Analysis: Twitter v. Taamneh

Dialogue Class Presentation

- Performed an in-depth analysis of the Supreme Court case *Twitter v. Taamneh*, evaluating the implications for platform liability and modern legal precedents.
- Presented findings to faculty and peers, facilitating a debate on the intersection of technology and constitutional law.

LEADERSHIP & EXTRACURRICULARS

Little Lights Non-Profit

Leader & Collaborator

- Coordinate promotional materials and biographies for student members of a music-based non-profit organization.
- Collaborate on fundraising efforts and community outreach projects.
- Played piano for different senior centers around NYC

Chemistry Club

Active Member

- Engage in advanced laboratory experiments and collaborative research with peers.
- Currently making soap to sell to Parents and children

Athletics & Creative Arts

- **Alpine Skiing:** Competitive racer with expertise in technical maneuvers and speed stance.
- **Captain of the Table Tennis Team (Browning):** Led the team to first in Browning Table Tennis History to win the Season Championship
- **Co-Captain of the Tennis Team (Browning)**
- **JV Soccer (Browning)**
- **2nd Place (2nd Doubles) (Brooklyn Technical High School) in the 2024-2025 PSAL Table Tennis League**
- **Played Piano for 11 years (ongoing)**
- **Performed in a guitar ensemble (Browning)**
- **Performed countless times in Opera America, and in senior centers in piano recitals**

SKILLS & LANGUAGES

Technical	Academic	Languages
Fusion 360 (CAD) Project Management Technical Writing	Constitutional Law Analysis Research Skills Dimensional Analysis (Chemistry) Math up to Algebra II education	English (Fluent) Polish (Fluent) Spanish (Intermediate)
